

Australian Preserved Trams  
Compiled by Douglas Colquhoun

System	Class	Fleet No.	Type of car	Builder	Year	Pres. Group	Location	Placed in museum	Status	Notes
This list was begun many years ago when Melbourne's Z-class cars were young. And now they are entering museums. The list contains 280 records; enough cars to service a moderately sized city, and yet I suspect that it is not complete to date. There are also many entries that are incomplete and/or contain errors.										
Any contributions in the form of new records, additions to those existing, and corrections will be very welcome, and may be e-mailed to me at <a href="mailto:Dougcol2003@yahoo.com.au">Dougcol2003@yahoo.com.au</a> . Douglas Colquhoun.										
DGT Sydney	C	29	4-wheel Saloon	Hudson Bros.	1898	STM	Loftus	/ 7/66	Not known	Converted to Breakdown car 60s 1910.
